Opportunity

Four new hospitals commence operations in YTD-24, boosting patient traffic; potential increase in contribution from COB should enhance profitability onwards; YTD underperformance provides buying opportunity

Weakness 3Q24 GPM declined to 35.3% (2Q24: 37.9%) and EBITDA margin fell to 27.7% (2Q24: 29.2%), mainly due to additional opex related to new hospitals opened in YTD-24 (IKN, Pasuruan, Madiun, Rumbai)

Threat Potential sur

Potential surge in salary expenses due to the hiring of foreign doctors; elevated USD/IDR exchange rate may lead to higher medicine and medical supply costs (c. 35-40% of COGS), pressuring future margins
