

Monthly Report of May 2025

Highlights

- **Proyeksi Pertumbuhan Diturunkan:** Proyeksi pertumbuhan PDB Indonesia 2025 dipangkas ke bawah 5% akibat lemahnya konsumsi rumah tangga, PHK yang menimpa lebih dari 24,000 orang, dan serapan fiskal yang lambat. Sebagai catatan, pertumbuhan PDB Q1 hanya mencapai 4.87% YoY.
- **Stimulus Moneter dan Fiskal Digulirkan:** BI memangkas suku bunga acuan ke 5.50%, disertai stimulus konsumsi enam poin dari pemerintah yang berlaku mulai Juni, untuk memulihkan daya beli pasca-Ramadan.
- **Posisi Eksternal Menguat:** Defisit transaksi berjalan (CAD) Q1 menyempit drastis menjadi 0.1% PDB, ditopang surplus perdagangan; namun neraca jasa dan pendapatan masih rentan terhadap tekanan tarif global.
- **Akselerasi Reformasi Struktural:** SWF Danantara mempercepat konsolidasi BUMN. Pemerintah meluncurkan kerangka KEM-PPKF 2026 yang menekankan keberlanjutan fiskal, kemandirian energi, dan digitalisasi, meski pendapatan negara menurun.
- **Kekhawatiran Tata Kelola dan Sosial Meningkat:** Di tengah kemajuan AI dan infrastruktur digital, muncul kekhawatiran terhadap kemunduran demokrasi, kesenjangan inklusi sosial, lemahnya regulasi gig economy, dan tekanan ESG di sektor ekstraktif.

Overview

Di bulan Mei 2025, perekonomian Indonesia menunjukkan keseimbangan rapuh antara optimisme reformasi dan masalah struktural. Pemangkasan suku bunga BI kedua tahun ini dan penyempitan CAD ke 0.1% PDB memberi kelegaan jangka pendek. Namun, prospek pertumbuhan direvisi di bawah 5% karena lemahnya konsumsi, penurunan penerimaan negara, dan gelombang PHK yang berlanjut.

Pemerintah terus mendorong konsolidasi BUMN oleh Danantara, meluncurkan stimulus konsumsi enam poin, dan menyiapkan kerangka KEM-PPKF 2026 yang menekankan keamanan energi, kedaulatan digital, dan pertumbuhan hijau. Meski begitu, sentimen investor masih cenderung negatif akibat kekhawatiran demokrasi, celah regulasi, dan tensi dagang global. Kualitas eksekusi—terutama dalam realisasi fiskal, kepatuhan ESG, dan konsistensi kelembagaan—akan menjadi kunci menjaga momentum makro ke semester II 2025.

Isu Utama

Ekonomi, Bisnis & Keuangan

Pertumbuhan PDB Direvisi Turun: Pertumbuhan PDB Indonesia untuk tahun 2025 telah diturunkan di bawah 5% (dari estimasi sebelumnya sebesar 5.1–5.2%) di tengah tanda-tanda melemahnya konsumsi rumah tangga, stagnasi industri, dan penyerapan fiskal yang lemah. PDB Q1 2025 melambat menjadi 4.87% YoY, dengan kontraksi triwulanan sebesar -0.98%. Penurunan penjualan ritel dan otomotif pasca-Ramadhan yang tinggi (25–28%) dan PHK yang melebihi 24,000 pada bulan Mei mendukung permintaan domestik yang lebih lemah.

Pelonggaran Moneter dan Stimulus Konsumen: Bank Indonesia (BI) melaksanakan pemotongan suku bunga kedua tahun 2025, menurunkan 7DRRR menjadi 5.50%, dengan alasan inflasi yang terkendali (April: 1.95% YoY), Rupiah yang lebih kuat, dan permintaan yang lemah. Analisis telah merekomendasikan pendekatan tunggu dan lihat karena ketegangan perdagangan global, tetapi BI memanfaatkan jendela stabilitas yang singkat. Melengkapi ini, pemerintah meluncurkan paket stimulus konsumen enam insentif (berlaku efektif 5 Juni) yang ditujukan untuk meningkatkan daya beli dan meredam risiko terkait PHK.

Monthly Report of May 2025

Kebijakan Likuiditas & Dukungan Pasar: Mulai bulan Juni, BI akan memangkas GWM sekunder dari 5% menjadi 4% dan akan membebaskan likuiditas perbankan tambahan sebesar IDR 78.45 triliun (USD 4.84 miliar). Langkah ini bertujuan untuk mendukung ekspansi kredit dan meningkatkan transmisi moneter.

Defisit Akun Berjalan (CAD) Menyempit: CAD Indonesia pada Q1 2025 turun tajam menjadi hanya 0.1% dari PDB (USD 0.2 miliar), yang sebagian besar didukung oleh surplus perdagangan yang kuat dan ekspor yang tangguh. Namun, kelemahan struktural dalam akun jasa dan pendapatan primer masih berlanjut. Ketegangan tarif global yang berkepanjangan masih dapat memperlebar defisit hingga 1.5% dari PDB.

APBN & Tekanan Fiskal: Kerangka makro KEM-PPKF 2026 diluncurkan, yang menargetkan pertumbuhan 5.3% dan defisit fiskal 2.48–2.53%. Area fokus meliputi ketahanan energi, ketahanan pangan, dan pembangunan hijau. Namun, pendapatan negara yang menurun (turun 12.4% YoY pada Januari–April) dan risiko inflasi menjadi tantangan dalam implementasi.

Peran Danantara yang Semakin Luas: Dana investasi negara Danantara telah mulai mengkaji 800+ BUMN untuk konsolidasi pada tahun 2029. Dana ini juga memulai rencana penerbitan obligasi untuk mendukung sektor-sektor strategis. Sementara upaya ini meningkatkan sentimen pasar, kekhawatiran atas tata kelola, transparansi, dan pelaksanaan tetap menonjol.

Tren Pasar Modal & Obligasi: Imbal hasil obligasi berfluktuasi, dengan imbal hasil SUN acuan 10 tahun berkisar sekitar 6.8–6.92% pada akhir Mei. Arus masuk asing ke obligasi (USD +1.04 miliar YTD) terus berlanjut, sementara ekuitas mengalami arus keluar bersih (USD -2.85 miliar YTD). IHSG memperoleh momentum, mendekati level resistensi 7,373, dipimpin oleh IDXFin dan IDXTech meskipun momentum sektoral melemah.

Politik dan Keamanan

Reformasi di Persimpangan Jalan: Reformasi tata kelola pemerintahan Presiden Prabowo menghadapi penolakan atas pengangkatan pejabat yang terkait dengan militer, isu kebebasan pers, dan penulisan ulang kurikulum sejarah nasional yang kontroversial. Kelompok masyarakat sipil menandai 27 tahun Reformasi dengan peringatan akan erosi demokrasi.

Pergerakan Kabinet & Risiko Suksesi: Spekulasi suksesi menyelumuti Menteri Keuangan Sri Mulyani dan Gubernur BI Perry Warjiyo. Perubahan potensial dapat memengaruhi sinergi fiskal-moneter, pengendalian inflasi, dan stabilitas Rupiah.

Korupsi & Keamanan Investasi: Pemerintah mempercepat tindakan keras anti-pemerasan setelah kasus intimidasi yang menargetkan investor industri. Kadin sedang menyelidiki skandal petrokimia yang melibatkan organisasi massa nakal, yang menandakan penegakan hukum yang lebih baik—tetapi berisiko secara politis.

Ekonomi Digital dan Perusahaan Telekomunikasi

Dorongan Kedaulatan Digital: Sistem QRIS Indonesia akan terintegrasi dengan Jepang dan Tiongkok pada bulan Agustus, yang mendukung interoperabilitas digital. Pusat Data Nasional 1 (PDN-1) akan diluncurkan pada bulan Juni. Sementara itu, Worldcoin ditangguhkan karena pelanggaran peraturan, yang mencerminkan pengawasan digital yang lebih ketat.

Turbulensi Transportasi Online & Fintech: Protes dari 500,000 pekerja lepas menyoroti ketidakamanan pendapatan dan perlunya regulasi ketenagakerjaan digital yang lebih jelas. Penggabungan GoTo-Grab menimbulkan kekhawatiran atas persaingan. Layanan BNPL menunjukkan tanda-tanda kelelahan di tengah filter kredit yang lebih ketat.

Pengembangan AI Berkembang: Indonesia meningkatkan kemampuan AI-nya dengan aplikasi dalam pemodelan iklim, keuangan, dan perawatan kesehatan. Pusat AI unggulan di Papua mendukung inklusi dan pendidikan digital.

Lingkungan dan Ekonomi Hijau

Energi Terbarukan Tertinggal Meski Ada Komitmen: Transisi hijau Indonesia menghadapi kendala pelaksanaan. PLN baru mencapai 7.6% dari target energi terbarukan tahun 2030, dan janji penghentian penggunaan batu bara dirusak oleh persetujuan proyek baru. Italia dan Tiongkok menandatangani perjanjian kerja sama lingkungan, sementara pengawasan ESG diintensifkan seputar praktik penambangan nikel.

Pembiayaan Iklim dan Mitigasi Risiko: Indonesia berencana menerbitkan obligasi terkait SDG untuk proyek perumahan dan iklim. Risiko musim kebakaran meningkat, dengan penambangan pasir dan nikel ilegal memicu protes hukum di Sulawesi dan Nusantara.

Isu Regional dan Lokal

Pembangunan & Ketegangan Papua: Program militer “TNI Manunggal Masuk Desa” (TMMD) dipuji sebagai akselerator pembangunan untuk Papua Tengah yang terpencil, tetapi kerusakan lokal dan kekerasan yang terus berlanjut di dataran tinggi membayangi pencapaiannya.

Monthly Report of May 2025

Keterlambatan IKN & Infrastruktur: Kemajuan di lokasi ibu kota Nusantara masih lamban di tengah kesenjangan pendanaan, keraguan investor, dan inefisiensi logistik. Protes publik atas pemindahan, kesenjangan distribusi energi (misalnya, di Balikpapan), dan penggunaan lahan meningkatkan risiko implementasi.

Pendidikan & Inklusi Sosial: Program Makanan Gratis menjangkau 3.9 juta penerima manfaat tetapi menghadapi masalah kebersihan dan kualitas. Kebijakan pendidikan baru menuai kritik karena mengecualikan siswa dengan kebutuhan khusus, yang mendorong seruan untuk perencanaan yang lebih inklusif.

Prospek

Prospek ekonomi makro Indonesia untuk 2Q25 tetap konstruktif dan hati-hati. Pemangkasan suku bunga dan penyempitan CAD menawarkan ruang bernapas, sementara reformasi strategis—terutama dalam rasionalisasi BUMN, infrastruktur digital, dan keuangan hijau—menjanjikan keuntungan jangka panjang. Namun, risiko pelaksanaan, pendapatan fiskal yang lemah, tantangan tata kelola, dan ketegangan tarif global yang baru tetap menjadi ancaman penurunan utama.

Lintasan jangka pendek akan bergantung pada:

- Penyampaian stimulus fiskal dan percepatan belanja publik;
- Konsolidasi BUMN dan tata kelola Danantara yang sukses;
- Guncangan eksternal akibat eskalasi tarif AS-UE dan kenaikan imbal hasil Treasury;
- Respon publik terhadap kebijakan sosial, pendidikan, dan militer yang kontroversial.

Pergerakan Pasar

GLOBAL

USD Index sejak awal pekan yang lalu turun. Sempat menguat hingga 100.5 sebelum tertekan kembali. Index belum berubah menjadi trend naik, cenderung konsolidasi di kisaran 99.7-100.1. mendekati support kuat pola sejak Jul23.

US Gov10yrs yield pada pekan lalu akhirnya turun sesuai perkiraan. Sempat coba naik ke 4.54, namun akhirnya turun lagi. Kemungkinan akan kembali turun ke 4.35-4.26, dengan batas rebound di 4.54.

Emas pada pekan lalu belum berhasil lampau 3365, sehingga pola bullish continuation belum terkonfirmasi. Harga masih di kisaran 3200-3365, meski pola jangka panjang masih trend naik.

Brent oil pekan yang lalu tidak berhasil menembus 66.63 sehingga trend turun sejak Jan25 masih bertahan. Kisaran penurunan di 64.3-61.0, hingga 58.51.

Nickel LME pekan yang lalu kembali melemah mengarah ke terendah pola sejak Dec24 (kecuali akhir Mar dan awal Apr2025) di sekitar 14860. Kemungkinan masih bergerak di kisaran 14860-15600, namun pelemahan dibawah 14860 dapat menekan harga ke arah 14500-14180.

CPO Malaysia pada pekan yang lalu mencoba melampaui 3880, namun kembali turun sehingga belum mengubah trend turun sejak Nov24. Kisaran masih di 3740-4130, dekat area terendah pola sejak Jul22, sehingga jika pelemahan berlanjut, maka cenderung akan tertahan di sekitar 3640.

SENTIMEN PASAR INDONESIA

Berdasar pola di kurs USDIDR dan trend di Indon CDS 5yrs berikut ini, maka sentimen market pekan ini mulai melemah, mungkin dalam konsolidasi sebelum perubahan sentimen jadi bearish.

IDR terhadap USD pada awal pekan yang lalu membentuk pola doji, setelah sempat mendekati 16135 area target penguatan teoritis. Kemungkinan kurs akan melemah mendekati 16350. Dan jika mampu lampau dan bertahan diatas 16350, maka kurs kemungkinan akan lanjutkan pelemahan ke arah 16555, area pelemahan awal Mar25 dan awal Mei25.

INDON CDS 5yrs pekan lalu kembali turun, melanjutkan pola penurunan sejak mid-Apr25. Masuk ke area Oct24-Mar25. Sehingga selama tidak mampu naik ke atas 82.6 maka pelemahan dapat menuju 75.2-71.2.

Yield Spread antara SUN vs UST 10yrs pekan lalu membesar, dan kemungkinan akan melanjutkan pembesaran di kisaran 2.3-2.5, menunjukkan sentimen UST lebih baik dari SUN.

OBLIGASI: yield SUN tenor 10 tahun pekan lalu mencoba turun melampaui trendline pola sejak Oct24, namun kembali naik menjelang libur panjang. Selama yield bertahan dibawah 6.88 maka trend penurunan yield dapat berlanjut ke 6.75 hingga 6.64.

Berdasarkan RRG chart, semua tenor lagging tipis terhadap tenor benchmark yang 10 tahun, kecuali yang 15-16-18 dan 30 tahun yang sudah mulai leading, dan semua sedang mengalami penguatan momentum kecuali tenor 2 tahun.

IDX pekan yang lalu alami pelemahan meski belum mengubah trend kenaikan sejak Mei25. Pelemahan dibawah 7100 dapat mengubah sentimen menjadi bearish. Area resistance terdekat di 7325-7380.

Monthly Report of May 2025

Berdasarkan RRG Chart, sektor yang leading terhadap IHSG, hanya IDXFin dan IDXTech, namun keduanya mengalami semakin mengalami pelemahan momentum. Sektor lagging hampir semuanya mengalami kenaikan momentum kecuali IDXIndus.

Korelasi Hasil Ekuitas-Obligasi

Korelasi hasil ekuitas-obligasi AS selama 3 hari menunjukkan pergeseran ke arah alokasi portofolio yang lebih seimbang, dengan kedua pasar diuntungkan oleh sentimen yang membaik. Meredanya ketegangan global baru-baru ini telah mendukung selera risiko dalam ekuitas, sementara obligasi telah mendapatkan kembali daya tariknya sebagai lindung nilai, menandakan optimisme yang hati-hati di tengah ketidakpastian geopolitik yang masih ada. Presiden Trump kembali memicu ketegangan dengan Tiongkok, menuduh melalui media sosial bahwa Beijing telah "benar-benar melanggar" perjanjiannya dengan AS, meskipun ia tidak memberikan rinciannya. Hal ini terjadi tepat ketika pengadilan banding federal untuk sementara waktu memberlakukan kembali tarifnya—hanya sehari setelah pengadilan perdagangan memutuskan menentang—menambahkan lapisan volatilitas lainnya. Di sisi ekonomi, indeks harga PCE naik sedikit sebesar 0.1% dari bulan ke bulan, sesuai dengan ekspektasi, sementara pembacaan inflasi tahunan mereda. Pertumbuhan belanja pribadi juga melambat menjadi 0.2%, memperkuat pandangan bahwa tekanan inflasi sedang menurun. Perkembangan ini memperkuat argumen untuk potensi pemangkasan suku bunga Federal Reserve akhir tahun ini. Untuk bulan Mei, imbal hasil acuan Treasury AS telah menurun lebih dari 20 basis poin, yang menggarisbawahi penyesuaian pasar yang lebih luas.

Di Indonesia, korelasi imbal hasil ekuitas-obligasi 3 hari sangat mencerminkan pola AS, yang menunjukkan aliran positif berkelanjutan ke kedua kelas aset. Korelasi yang kuat ini dapat bertahan setidaknya selama seminggu lagi, yang mencerminkan kepercayaan investor terhadap stabilitas domestik. Dinamika seperti itu menjadi pertanda baik bagi Rupiah, harga obligasi pemerintah, dan valuasi ekuitas.

Indonesia Bond Yield Correlation

The chart displays the correlation between 3-day equity returns and 3-month Treasury yields from February 2025 to May 2025. The y-axis represents the correlation coefficient, ranging from -1.20 to 1.20 in increments of 0.20. The x-axis shows dates at two-week intervals: 04-Mar, 18-Mar, 01-Apr, 15-Apr, 29-Apr, 13-May, and 27-May. The correlation is highly volatile, starting around -0.50 in early March, peaking near 1.0 in mid-March, and then fluctuating between -1.0 and 1.0 for the remainder of the period. Notable troughs occur around late March and mid-April, while peaks are seen in mid-March, early April, and mid-May.
