

1st Week of December 2025

Highlights

- Cadangan devisa naik ke USD 150.1 miliar, tertinggi sejak Agustus dan sejalan dengan proyeksi SSI.
- PMI Manufaktur menguat ke 53.3, didorong oleh permintaan domestik meski pesanan luar negeri melemah dan ada gangguan rantai pasok akibat cuaca.
- Inflasi turun ke 2.72%, lebih rendah dari estimasi SSI dan konsensus.
- Bencana Sumatra menjadi guncangan makro besar, dengan estimasi kerugian ekonomi mencapai IDR 28.8–37.1 triliun dan penurunan pertumbuhan PDRB Sumatra ke level –2.5% hingga –0.8% (Fithra Faisal Hastiadi).
- Pasar obligasi semakin dipengaruhi “fiscal dominance”; yield tenor panjang naik meski BI berada dalam siklus pelonggaran..

Ikhtisar

Indonesia menutup pekan dengan lanskap makro yang kuat: stabilitas eksternal membaik di saat cadangan devisa naik ke USD 150.1 miliar (sesuai proyeksi SSI, sementara momentum manufaktur juga menguat dengan kenaikan PMI ke 53.3 meski gangguan pasokan akibat cuaca masih terasa. Inflasi melemah ke 2.72%, memberi ruang kebijakan tambahan bagi BI, dan surplus perdagangan tetap solid. Namun, bencana Sumatra menjadi guncangan makro signifikan, dengan estimasi kerugian IDR 28.8–37.1 triliun, penurunan pertumbuhan PDRB ke level –2.5% hingga –0.8%, kenaikan pengangguran, dan tekanan inflasi akibat disrupsi logistik. Guncangan ini terjadi bersamaan dengan risiko fiskal yang sudah ada, memperkuat tren fiscal dominance di pasar obligasi, di mana yield tenor panjang terus naik meski BI melonggarkan kebijakan. Pasar saham tetap konstruktif, didukung arus domestik dan rotasi sektoral menuju industrial dan teknologi, sementara perkembangan ekonomi digital—dari AI pariwisata hingga dukungan darurat Starlink—menambah sinyal positif.

Isu Utama

Ekonomi, Bisnis dan Keuangan

Sektor Eksternal — Ketahanan Valas Menguat

Cadangan devisa Indonesia naik ke USD 150.1 miliar, sedikit lebih tinggi dari Oktober dan tertinggi sejak Agustus. Angka ini sejalan dengan proyeksi SSI sebesar USD 150 miliar, menegaskan kuatnya buffer eksternal Indonesia di tengah volatilitas global.

Pendorong utama:

- Kuatnya penerimaan pajak dan jasa,
- Penarikan utang luar negeri pemerintah,
- Langkah stabilisasi BI yang terkalibrasi.

Rasio kecukupan cadangan mencapai 6.2 bulan impor (6.0 bulan setelah kewajiban utang luar negeri pemerintah)—jauh di atas ambang batas 3 bulan. Ini memberi ruang luas untuk operasi stabilisasi valas di saat AS memasuki siklus pemangkasan suku bunga, Jepang memberi sinyal pengetatan, dan ketegangan geopolitik terus memengaruhi likuiditas global.

Bencana Sumatra — Guncangan Makro Regional Sistemik

(Berdasarkan Laporan Fithra Faisal Hastiadi untuk Presiden)

Banjir dan longsor akhir November menjadi salah satu bencana paling merusak secara ekonomi dalam lebih dari satu dekade.

Total Kerugian Ekonomi: IDR 28.8–37.1 triliun

- Kerusakan infrastruktur: IDR 15.2–20.8T
- Kerugian produksi: IDR 9.5–11.4T
- Kerugian rumah tangga: IDR 4.1–4.9T

Efek langsung sudah terlihat saat ini: gangguan logistik, tekanan harga pangan, dan keterlambatan rantai pasok.

Dampak Makro pada Sumatra

- **Pertumbuhan PDRB:** –2.5% hingga –0.8% (bulan ke-2 hingga ke-4).
- **Inflasi:** naik +0.3% hingga +1.2%, puncak bulan ke-3 hingga ke-5.
- **Pengangguran:** naik +1.2% hingga +3.5%, pemulihan 24–36 bulan.
- **Investasi:** turun –1.3% hingga –4.0%, pulih seiring rekonstruksi.

1st Week of December 2025

Dampak pada Tenaga Kerja & Kemiskinan

- 238,000 pekerja terdampak dengan penurunan pendapatan 15–35%.
- Pariwisata (–35%) dan transportasi (–28%) menjadi sektor paling tertekan.
- Tanpa intervensi → 235,000 PHK
- Dengan intervensi → 96,000 PHK (penurunan 59%)

Kenaikan kemiskinan:

- +2.5pp (tanpa intervensi) → +672,000 orang
- +0.3pp (intervensi penuh) → +81,000 orang

Skenario Pemulihan

- **Pesimistis (IDR 25T):** GDP –3.2%, pemulihan 28 bulan
- **Base Case (IDR 40T):** GDP –2.0%, pemulihan 20 bulan
- **Optimistis (IDR 50T):** GDP –1.3%, pemulihan 14 bulan
- **Build Back Better (IDR 60T):** GDP –0.9%, pemulihan 10 bulan

Rekomendasi Respons Fiskal: IDR 50–52T

- Infrastruktur: IDR 22.5T
- Bantuan tunai darurat: IDR 6.8T
- Subsidi upah: IDR 5.2T
- Kredit UMKM: IDR 5.5T
- Dukungan sosial/pertanian: IDR 7T
- Pengurangan risiko: IDR 4T

Tahap 1 (IDR 10.5T) harus disalurkan dalam 60 hari untuk mencegah economic scarring permanen.

PMI Manufaktur — Menguat, Namun Terganggu Cuaca, PMI naik ke 53.3, tertinggi sejak Februari.

Kekuatan:

- Pesanan baru meningkat
- Output membaik
- Pembelian input naik
- Rekrutmen naik 4 bulan berturut-turut

Tekanan:

- Waktu pengiriman melonjak akibat banjir Sumatra
- Inflasi biaya input tertinggi sejak Februari
- Pesanan luar negeri turun paling tajam dalam 14 bulan
- Sentimen melemah ke level terendah 4 bulan

Inflasi — Mereda, Memberi Ruang Kebijakan BI

Inflasi turun ke 2.72% YoY, di bawah proyeksi SSI (2.92%) dan konsensus (2.75%).

Pasar Obligasi — Dominasi Fiskal Semakin Jelas

Meski BI telah menurunkan suku bunga 75bps sejak 2024, yield instrumen tenor panjang tidak ikut turun.

Proyeksi yield:

- 10Y: 6.28% (Akhir 2025)
- 2026: naik ke 6.55%
- 20–30Y: 6.95–7.38%

Kenaikan didorong oleh:

- Premi fiskal: naik 12 → 38 bps
- Premi defisit: naik 1 → 8 bps

Dekomposisi varians IRF menunjukkan:

- 30% varians tenor 10Y disebabkan oleh fiscal shocks
- 45% varians tenor 30Y disebabkan oleh fiscal shocks

Dengan kebutuhan rekonstruksi Sumatra yang diperkirakan mencapai IDR 50–52T, kebutuhan pembiayaan fiskal berpotensi meningkat dan dapat memperkuat tekanan kenaikan pada yield tenor panjang.

Dunia Korporasi

- Garuda Indonesia memperoleh tambahan modal dari Danantara untuk mengaktifkan kembali pesawat yang saat ini tidak beroperasi, demi menampung kenaikan permintaan pada akhir tahun.
- Penerimaan pajak digital mencapai IDR 43.75T, mencerminkan pertumbuhan pesat ekosistem digital.
- Sentimen konsumen tetap hati-hati di tengah tekanan biaya hidup.

Politik dan Urusan Nasional

Bencana di Sumatra mendominasi agenda nasional, dengan lebih dari 770 korban jiwa, lebih dari 1 juta pengungsi, kerusakan infrastruktur berskala besar, dan lumpuhnya jaringan transportasi serta logistik.

1st Week of December 2025

Masalah logistik mencakup:

- jalan yang terblokir,
- distribusi BBM yang terganggu,
- pemadaman listrik yang menghambat operasi darurat.

Konflik internal NU semakin meningkat terkait isu konsesi pertambangan dan ketegangan tata kelola organisasi.

Diskusi mengenai potensi amandemen mandat BI kembali muncul, menimbulkan kekhawatiran bahwa peran BI dapat kembali menyerupai struktur intervensi sebelum reformasi.

Ekonomi Digital dan Telekomunikasi

- Indonesia meluncurkan MAiA, asisten pariwisata berbasis AI untuk mendukung personalisasi rekomendasi perjalanan.
- Perkembangan di Apple dan OpenAI menjadi bentuk perubahan lanskap tata kelola digital global.
- Starlink menyediakan layanan konektivitas darurat gratis bagi wilayah Sumatra yang terdampak bencana.

Perkembangan Daerah dan Lingkungan

- Siklon Senyar—fenomena yang sangat jarang terjadi di perairan Indonesia—menjadi penyebab utama banjir besar yang terjadi.
- Aktivis lingkungan memperingatkan bahwa deforestasi dan lemahnya pengelolaan daerah aliran sungai memperparah skala dampak banjir.
- Bali mempertimbangkan regulasi terhadap akomodasi model Airbnb.
- KAI memperkenalkan gerbong kargo khusus untuk petani dan pedagang guna memperkuat rantai pasok di daerah.

Outlook

Faktor Pendukung

- Cadangan devisa kuat
- Inflasi mereda
- Arus masuk obligasi jangka pendek stabil
- Ekonomi digital tumbuh
- Aktivitas manufaktur menguat

Risiko Penurunan

- Shock ekonomi besar dari bencana Sumatra
- Risiko inflasi dari disrupsi logistic
- Tekanan fiskal untuk rekonstruksi
- Volatilitas yield jangka panjang
- Lemahnya permintaan global

Fundamental makro Indonesia tetap kokoh, tetapi kendala sisi pasokan, beban fiskal, dan volatilitas obligasi jangka panjang akan semakin dominan memasuki 2026. Keberhasilan rekonstruksi—dan kecepatan penyaluran paket pemulihan IDR 50–52T—akan menentukan apakah Indonesia kembali ke jalur pertumbuhan pra-bencana dalam 14–20 bulan atau mengalami economic scarring berkepanjangan.
